

Keep cool – the variable segment hose system!

LEGROM **Safety jet nozzles**

For targeted blowing out and off
Lower noise level, higher safety
Energy saving

LEGROM

Safety jet nozzles

- Particularly low noise, up to 12 (A) quieter than similar nozzles.
- Lower noise level which provides higher safety at work
- Low air consumption saves power at work
- Multichannel round jet nozzle with a powerful, punctiform air stream

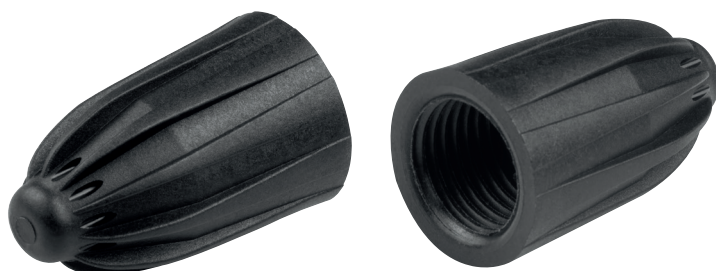

Usage

Targeted blowing out and off, e.g. in conjunction with air pistols or as a industrially used process nozzle e.g. presses or automation systems.

Also used for fine blowing out tasks e.g. precision mechanics, mold construction or in the plastics industry.

Safety jet nozzles

Model	Order.-Nr.
Safety jet nozzle G1/4" IG, 10 x Ø 1.0 mm	509-041
Safety jet nozzle G1/4" IG, 10 x Ø 2.0 mm	509-045
